EXPERIENCE

Software Engineer — Full Stack

Mercor · Remote · Aug 2026 – Present

- Develop and maintain full-stack applications using modern web technologies, building scalable, reliable, and high-performance software solutions.
- Collaborate with cross-functional teams to design, implement, test, and improve production-ready features
- Contribute to both front-end and back-end development, with a focus on clean code, system performance, and user experience.

Software Engineer — Full Stack

Avodah Creatives · Amsterdam, Netherlands · Sep 2025 – June 2026

- Led full-stack feature development using Next.js and Node.js, delivering responsive, production-ready web applications on schedule.
- Optimized critical rendering paths and API response times, achieving measurable improvements in performance and user retention.

Front-End Developer

reAI · California, USA · Oct 2025 – Jan 2026

- Built accessible, responsive interfaces in React.js for AI-powered products, collaborating closely with design and backend teams.
- Championed UX best practices across the codebase, reducing user-reported friction and improving core web vitals scores.

Software Engineer (intern)

Holistic Intelligence for Global Good · Seattle, WA · Nov 2024 – Aug 2025

- Designed and deployed scalable web services with React.js and Node.js, increasing system reliability and uptime for healthcare clients.
- Integrated AI/ML features using Python (TensorFlow & Flask), enabling predictive analytics for sustainability and health monitoring applications.

AI Prompt Engineer

Outlier · USA (Remote) · Mar 2024 – Dec 2025

- Designed and iterated on prompts for large language models, reducing output ambiguity and improving response accuracy across multiple task categories.
- Analyzed model output patterns to surface systematic failure modes, feeding findings directly into model improvement pipelines.

PROJECTS

Skillio

- **Interactive Roadmaps & Progression:** Tracks sequential phases with prerequisite locking (e.g., Phase 1 unlocks Phase 2) so learners move linearly from foundational concepts to advanced projects.
- **Skillio AI Generator:** A path-mapping engine that takes a user's stated outcome (e.g., "AI Engineer") and auto-generates a multi-phase curriculum covering core languages, math, frameworks, and deployment.
- **Progress Command Center ("My Journey"):** Provides a dashboard tracking overall completion percentage, hours spent, completed nodes, and active project milestones.

QUICK

- **Price Comparison Engine:** Aggregates listings across major retailers to display store-by-store prices, estimated shipping fees, and warranty/delivery terms in a single view.
- **Product Catalog & Categorization:** Features an catalog (nearly 800 products across 8 categories, including Phones, Laptops, Audio, TVs, Wearables, Gaming, Tablets, and Cameras).
- **Smart Natural Language Search:** Allows users to query items in plain language (e.g., "Gaming laptop", "Wireless earbuds") without requiring exact model or part numbers.

Veloura

- **Interactive Option Selection:** Customers can toggle between size options (e.g., *S / M / L* or *Small / Medium / Large*) directly on product cards or detail views.
- **Instant Filtering:** Filter product grids dynamically without page reloads, providing a smooth, high-performance browsing experience
- **Visual State Feedback:** Selected variants display clear, active state indicators to eliminate order confusion.

Waha

- **Transparent Payment Plan Calculators:** Instead of vague "starting from" figures, the site features interactive calculators that break down exact figures—such as an illustrative down payment and monthly installments for interest-free developer plans.
- **Side-by-Side Comparisons:** Allows buyers to line up multiple properties to compare specifications, pricing, and payment terms directly.

Oak & Beans

- **Interactive Menu & Ordering:** Customers can browse through an organized catalog of items (coffee, beverages, and desserts), search for specific cravings, and manage an active cart/order summary panel.
- **Branding & Identity:** Positioned around the tagline "Coffee · Desserts · Community," the layout emphasizes a cozy, artisanal cafe experience.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python, R , C++, Ruby, SQL

Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Sass, Responsive Web Design

Backend Development: Node.js, Express.js, NestJS, FastAPI, Flask, REST APIs, GraphQL, WebSockets, tRPC, Prisma

Databases & Data: PostgreSQL, MySQL, MongoDB, NoSQL, Elasticsearch, Vector Databases

Cloud & DevOps: AWS, Google Cloud Platform (GCP), Microsoft Azure, Docker, Kubernetes, Nginx, CI/CD, GitHub Actions, Jenkins

Testing & Quality: Jest, React Testing Library, Mocha, Cypress, Test-Driven Development (TDD), Unit Testing, Integration Testing

AI & Machine Learning: Prompt Engineering, Large Language Models (LLMs), OpenAI API, Anthropic API, LangChain, LlamaIndex, Retrieval-Augmented Generation (RAG), Vector Databases, AI Workflow Integration

Data & Analytics: Data Analysis, Data Interpretation, Business Analysis, Data-Driven Decision Making, SQL Analytics

EDUCATION

B.Sc. Computer Science · Aswan University

Sep 2019 – Jun 2022

Graduated with a 3.9 GPA. Coursework covered algorithms, data structures, software engineering, databases, operating systems, and computer networks. Software Engineering ·

ALX Africa (Merit Scholarship)

Jan 2022 – Mar 2023

Intensive, project-based software engineering program covering low-level programming (C), system engineering, DevOps, and full-stack web development. Awarded on a competitive merit scholarship.
